Jay Phelan's *What Is Life: A Guide to Biology* is written in a delightfully readable style that communicates complex ideas to non-biology majors in a clear and approachable manner. After reading Phelan's book, students will understand why they would want to know and talk about science. His skillful style includes asking stimulating questions called *Q* questions which encourage the student to keep reading to find the answer and will illuminate just how relevant science is to their life.

Asks the student to write all answers in this study guide workbook. This workbook is interactive because it requires students to do things instead of just read more material. All questions are arranged by chapter/modules so students may skip unassigned material. Each module in the study guide refers to the page numbers of the corresponding module in the text. There is a wide variety of questions: multiple choice, questions to be filled in, art to be labeled, true/false questions requiring students to write the correct answer if the statement is false, thought-provoking conceptual questions, boldfaced terms requiring a written definition, list of objectives in fill-in-the-blank format, and other types of questions.
